RAINBOW TULIPS

B7064X—These are all Holland-grown bulbs of fine quality, each measuring 11 to 12 centimeters in diameter. This is not a grab-bag mixture, no one-horse-to-one-rabbit deal, but a definite number of named varieties of different colors. We have priced these Tulips very low. We don't expect to get rich on them, but we do expect to make a lot of friends. When you grow them, you will recognize their quality and be proud of them when they bloom in your yard. So order plenty and have a good showing of beautiful tulips in your yard next spring.

At maturity, plant gets about two or three feet tall, and continues to make a wider clump. DAFFODILS

Daffodils (sometimes called Narcissus also) are among the most beautiful of bulbous flowers, and they grow well in most parts of the U.S., particularly the midwest. Once established, they live for years.

Plant them 4 or 5" deep in heavy soils, or 6 to 8" deep in light sandy soils. Use them in beds, as edgings to walks or beds, around shrubbery, or in groups in lawns or woodland places. They are among the finest of all cut flowers too.

It is good to lift and replant the clumps of bulbs every three or four years, to avoid crowding. Before doing this, let the foliage turn to a lifeless yellow.

Daffodils also make fine house plants for early spring bloom. For this purpose, they should be potted in the fall and left in a cool dark place until about January. Then bring them into a warmer area, but not in full light, until the leaves start up well. When the buds start showing, bring the plant into full sunlight.

FALL-PLANTED PERENNIALS

Start Earlier, Grow Better Next Spring

Fall is the best time to plant perennials. Just mulch the first year, after ground freezes, to prevent heaving.

Order now. Shipment will be made as soon as plants are dormant, sometime in October.

How Our New Method of Wrapping Perennials Gives You Better Plants

Practically all of the perennials that we ship in the fall are field-grown plants. Just as soon as they become dormant enough, we dig them and bring them into our seed-house for wrapping. They are enclosed (partially or fully, depending upon the kind of plant) in a polyethylene plastic film.

This polyethylene film retains moisture so that the plant doesn't dry out. At the same time, gases can pass back and forth thru the film so the plant can "breathe", as it must to live.

By wrapping our perennials in this plastic film, we can ship them to you without their drying out or smothering while on their way to you. Whether you live fifty miles away, or clear across the country, the plants reach you in the same good condition.

After you receive the plants, get them into the ground quickly. However, because of the protection given the plants by the plastic film, they can be kept safely for several days before planting if necessary.

Pictured at left are two perennials packed in polyethylene plastic film. The top one is an Aster plant, fully enclosed in a plastic bag. The lower one is an Iris; this plant ships better if only the roots are enclosed in the plastic film.

HARDY PHLOX

(Pictured on Opposite Page)

Fall is the best time for planting phlox. The roots get hooked into the soil and the plants are "rarin' to go" with the first breath of spring. Mulch well after (not before) ground freezes the first winter.

Phlox grow 18" to 36" high, depending upon soil. They like full sun, but do well in partial shade. The pastel pinks and blues look better in partial shade where the sun won't fade them.

Phlox bloom in July and August, and are perfectly hardy. Keep the flowers cut so the plants won't go to seed and quit blooming. The seedlings usually come a muddy magenta color and, being vigorous, crowd out your good varieties.

POSTPAID PRICES on the following 6 phlox are **65c each; 3 for 1.65:**

B1614—EVA FORESTER. Flowers of tremendous size. One of the best.

CREEPING PHLOX

(Phlox Subulata)

Sometimes Called Moss Pink

Our picture at the right shows the different colors of Creeping Phlox as they grow in our nursery rows. You can see by this picture, as well as the one above it, how they would make perfect borders or edgings for walks, and driveways.

Creeping Phlox also are ideal bank binders where there often is a wash.

They do well in hot and rather dry location; thrive in full sun or partial shade. Have masses of moss-like foliage which stays green all winter. In spring, the low mound-like plants are covered with brightly colored flowers.

CHRYSANTHEMUMS

Chrysanthemums are among the best of all perennials, being easy to grow, hardy, free-blooming, colorful and beautiful. Normally they bloom from early September until severe frost, providing loads of colorful flowers in your garden, and for cutting, long after most other flowers have quit blooming. Be sure to mulch well the first winter.

Fuchsia Fairy

B1419—We list this one separately because it is so different. It has a mass of 1" flat, fully double, fuchsia-colored flowers. This mum makes a plant 2 feet across, and about as high, that is literally loaded down with blooms. Because of its attractive color and profusion of bloom, it is one of the best varieties we

offer. 59c each; 3 for 1.59; 6 for 2.89, ppd.

4 New Giant-Flowered Mums

B1450—ROYAL VELVET. One of the exquisite new introductions of Orville Dunham of Michigan. The immense, incurving blooms are a rich purple with a slightly silvered reverse—just enough to set off the vivid coloring. Worthy of anyone's garden. Stiff stems on a plant of medium height. You will have never seen a purple mum like this one before.

B1401—CRIMSON MAGIC. Our idea of the perfect crimson chrysanthemum. The great, full, deeply reflexed blooms of richest dark velvet crimson are almost indescribable in their beauty. The bushy, upright plants produce a quantity of non-

fading, frost-resistant 6-inch blooms. This is one of the best of all mums.

B1447—PRAIRIE SUNSET. In our opinion, this one tops them all. Huge, brilliant, amber-bronze giants of blooms that resemble the great greenhouse "football mums." Plant grows compact and well branched. An outstanding introduction.

B1437—HEART'S DESIRE. A gorgeous mauve pink of huge size with deeply reflexed blooms. The flowers are beautiful when allowed to bloom naturally in a spray, or will attain immense size if disbudded.

PRICES on above four: 1.00 each; 3 for 2.75, postpaid to your door.

Mass-Flowered Mums

B1425—GOLDEN FANTASY. (U. of Minn. No. 49-9-1). Just released this year, 1957. Masses of 2½" to 3"

fully double blooms with tubular petals, three-pronged and forked, giving the effect of a big golden carnation. Plant grows upright. Foliage is clean dark green. 1.00 each; 3 for 2.75, postpaid.

B1470—WHITE CLOUD. (U. of Nebr.) Large 3" blooms of pure white with center of palest lemon-yellow. Petals broad and attractive. Plant grows 2 feet tall. Best white mum we have ever seen. 69c each; 3 for 1.89, postpaid.

B1426—INDIAN RED (Lehman). One of the showiest plants in our 1956 trial grounds. Very large, fully double, 3½" flowers of bright copper-red. Petals radiate from a unique center swirl. Plant grows 2½ feet tall, compact, upright. Has large blossoms on long stems; fine for cutting. Foliage thick, dark green. 79c each; 3 for 2.10, postpaid.

Henry Fields HARDY LILIES

If you have never planted lilies in the fall, we urge you to do so. You probably know, of course, that the Madonna Lily should be planted in the fall only, but you will find that all lilies are particularly well adapted to fall planting. Just plant them in the usual way but, if you live where the ground freezes, mulch with 2 inches of coarse straw after the ground is frozen, particularly the first winter.

We have assembled here for you what we sincerely believe are the world's best lilies. Some are the old familiar favorites but some are new ones that will amaze both you and your friends with their great beauty.

CORAL LILY

B5005—(Tenuifolium). The most brilliantly colored Lily. A narrow-leaved, slender-growing plant from Siberia. Many flowers of deep scarlet, waxy and recurved, on each plant. Grows in poorest soil. Plant 4 to 6" deep. **39c each; 3 for 98c; 5 for 1.39, postpaid.**

FLAME LILY

B5011—(Red Russian). One of the easiest of all garden lilies to grow. Makes large clusters of blooms on plant which grows two to three feet high. Plant 6 to 8" deep. **59c each; 3 for 1.49, postpaid.**

New CENTIFOLIUM HYBRID LILY

50 or More Flowers per Plant

B5004—These are magnificent pure white hybrid lilies from the West Coast, perfected after over 15 years of hybridizing. They are the result of crossing of a half dozen or more lilies, and they far outshine the Regal Lily in every respect. After several years of growth, they reach a height of 6 to 8 feet with great clusters of 50 or more blossoms crowning the top.

The flowers are shaped like broad, flaring trumpets, and are pure white inside. The reverse of the petals are often pink, emerald green, or brown, making some striking contrast in color.

These lilies are exceedingly hardy, growing and bloom-

ing beautifully outdoors. Because of their deep root system, they stand severe drouth well. Plant 6" deep. **59c each; 3 for 1.49, postpaid.**

The Famous MADONNA LILY

Fragrant St. Joseph's Lily

B5016—This is the beautiful white lily you see blooming in so many gardens in May and June. It's also the lily you read about in the Bible. It blooms profusely, often bearing 10 to 20 snow white blooms at a time, and has a haunting perfume.

Madonnas are different from most lilies because they can be planted in late summer and early fall only. Better order yours now. Plant 2 to 3" deep. Grows 4 to 5 feet tall. **59c each; 3 for 1.49; 6 for 2.79, ppd.**

REGAL LILY

B5027—America's favorite hardy lily. Has large, pure white flowers tinged lightly with lilac outside and yellow inside. 10 or more blooms per stem. Plant 7 to 8" deep. **39c each; 3 for 98c; 5 for 1.39, postpaid.**

RAINBOW HYBRID LILIES

B5025—These are big, brilliantly-colored, new hybrids from the West Coast. Not only are they gorgeous but, since they have a lot of umbellatum, or Flame Lily, parentage, they are one of the most fool-proof, absolutely hardy lilies we know of. They grow anywhere.

Colors run from palest straw yellow to deepest gold with lots of maroons and deep reds—and sometimes with all these colors in one blossom. Long, tall stems. **59c each; 3 for 1.49, postpaid.**

PINK SHOW LILY

B5030—(Speciosum Rubrum). Flowers 4 inches across are carmine red on a white background with crimson spots. A very hardy plant that blooms profusely. Plant 7 to 8" deep. **69c each; 3 for 1.79, postpaid.**

3 NEW PACIFIC NORTHWEST HYBRID LILIES

The Corsage Lilies—as Beautiful and Lasting as Orchids

These lilies are from a group resulting from more than 15 years of skillful, patient crossing by Mr. Carleton Yerex in the Pacific Northwest. They are perfectly hardy and as easily grown as any other plant. Some grow stems higher than your head, topped by great clumps of magnificent, beautiful blooms.

They are without question the most beautiful lilies in the world today. As corsage flowers, they are more striking than orchids, and last longer.

PINK TRUMPET AURELIAN HYBRIDS

B5020—Not only one of the most beautiful of the new Yerex hybrids, but a hardy plant and a vigorous grower. To avoid sun-fading of flowers, it is best to plant Pink Trumpet in partial shade, or to protect at time of blooming. Plant 6" deep. **2.25 each; 3 for 5.98, postpaid.**

AURELIAN HYBRIDS

B5000—Wide, flaring reflex trumpet lilies in beautiful combinations of colors, including gorgeous sunburst effects. Flowers are 4" to 5" or more across and, as the plants grow older, form magnificent clumps of beautiful flowers. **98c each; 3 for 2.69; 6 for 5.19, postpaid.**

YELLOW TRUMPET AURELIAN HYBRIDS

B5037—From same seedling strain as spike of blooms that won Griffith Cup and Sweepstakes Award in 1950, and Award of Merit in 1951, at National Lily Show. Like Regal Lily but has stronger stems, larger trumpets of clear yellow. **1.98 each; 3 for 5.98, postpaid.**

NEW LILIES COLLECTION

B3471X—Top size bulbs of the scarce, new hybrids. Only a few firms have them; you can't duplicate this price anywhere. 1 Yellow Trumpet. 1 Pink Trumpet, and 1 Aurelian Hybrid—all 3 for **4.50, postpaid.**

Henry Field's NEW, HARDY HYBRID ELM

The Fastest Growing Tree in the Temperate Zone!

This amazing new tree combines the permanence and beauty of the American Elm with the rapid growth of the Chinese Elm. Grows 8 to 14 feet per year — giving you shade in a hurry! And it's apparently immune to Dutch Elm disease.

It is extra hardy. Keeps right on growing in weather hot and cold, wet or dry. Its leaves are large and dark green; the bark is smooth and a medium grey color. The branches are straight and strong — won't break in a high wind.

Hybrid Elms sometimes start slowly after planting. Maybe they won't do much for two months or so. Then all of a sudden, they start growing like mad. It's the nature of the tree so be patient with it.

The best time to plant Hybrid Elms is in the fall when trees become dormant enough to move (usually Oct., when we ship), up until the ground freezes solid. Mound a pile of dirt around base of the tree this winter to prevent frost heaving. Rabbits like young Hybrid Elms, so tie fine-mesh wire or our Aluminum Tree Protectors, or heavy paper, around the trunk for the first couple of winters.

Special on PHLOX for Fall Planting

For this collection, we selected four of the finest of all Phlox grown:

B1665B—SPITFIRE. A brilliant, fiery orange-red. One of the brightest.

B1637B—LILLIAN. A soft, clear cameo-pink. Finest of the pink Phlox.

B1613B—EVA FORESTER. One of the largest flowered of all Phlox. Beautiful salmon-pink.

B1660B—ROSY BLUE. A new one; soft blue tinted with rose. Very large flowers. Individual Prices: 65c each; 3 for \$1.65, postpaid. (Above four shown in full, actual colors in catalog.)

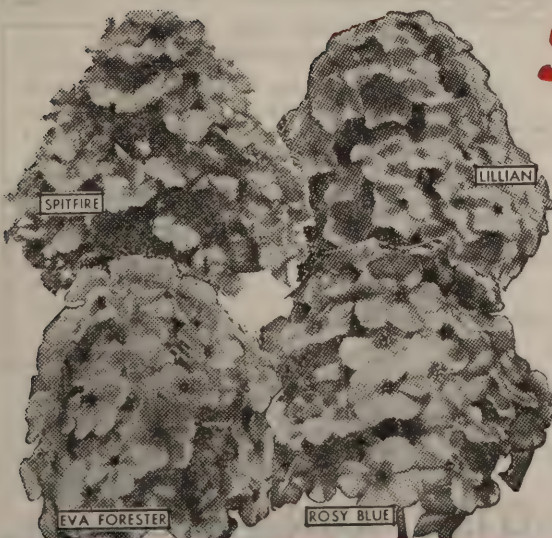

FALL IS EXCELLENT FOR PLANTING PHLOX. Plant them same as in spring. Then, just before ground freezes, mulch with straw or some other good mulch to prevent frost heaving. Or

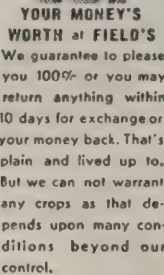

mound several inches of dirt over plants. Phlox are hardy almost anywhere but do not plant in a wet, soggy area nor in dense shade. They grow 2 to 3 feet tall and bloom in midsummer.

N138—AMERICA. Huge, beautiful, soft blue flowers held upright on long stems. Crisp, heart-shaped mammoth leaf. A beauty. **1.25** each; **3** for **3.49**.

N147—GENEVA BEAUTY. A new one with all the beauty of Lady Geneva and then some. Royal purple with a broad twinkling white edge to each petal that is much more distinct and striking than the edging on Lady Geneva. **1.25** each; **3** for **3.49**.

N166—DOUBLE KING NEPTUNE. A new deep purple with the largest of all double African Violet flowers. **1.75** each; **3** for **4.29**.

N529X—COLLECTION OF DOUBLE AFRICAN VIOLETS. 1 Double Calif. Dark Plum, 1 Double King Neptune, 1 Double Pink Ohio Bountiful, and 1 Double White Lace (latter two pictured on envelope). All **4** for **5.49**

N148—ALL AGLOW. Luminous deep coral pink, the deepest pink of them all, with red-rimmed eye. "Girl" foliage has deep rose undercoating. **1.25** each; **3** for **3.49**.

N135—WINTERGREEN. The foliage is a vivid variegation, or patch-work, of chartreuse and marbled forest green. The flowers are fully double, beautifully tinted light blue in the centers. **1.98** each; **3** for **5.25**.

N145—DOUBLE CALIFORNIA DARK PLUM. At last we have a double "red" African Violet. This is the famous California Dark Plum with double flowers—hosts of them on a strong-growing plant. California Dark Plum has long been recognized as the reddest of the African Violets. **1.75** each; **3** for **4.29**.

N137—DOUBLE BLUE PEAK. This is a new variety, and one that is very different and very beautiful both in form and color. Each blossom is fully double, with many petals. In color, each petal is a rich violet-blue with a distinct edging of clear white, like snow on a mountain peak. In addition, the plant is a prolific bloomer and strong grower. **1.98** each; **3** for **5.25**.

REX BEGONIAS

(Painted Leaf Begonias)

In our opinion, these are the most beautiful and brilliantly colored of all foliage plants. The range of colors and tones is simply amazing—reds, browns, greens, pinks, lavenders, purples, and combinations of these colors, often shot with gleaming silver.

Rex Begonias like plenty of light without direct sunlight, and moist air. Set the pot on (not in) a dish of moist pebbles. The plants have a semi-dormant period, usually from December to February. Then they

lose most of their leaves (and shouldn't be watered much) but the rest of the time they are amazingly beautiful. Prices on 3 varieties described below. **98c** each; **3** for **2.69**.

N237—CARDOZA GARDENS. Here's a beauty. Black shot with green and pink with rose spots on the outer border.

N253—SCARLET O'HARA. The really red leaved Rex. Its red tones vary with the season of the year and the age of the leaves, going from rich black maroon to flaming crimson. We expect this is the showiest of all the Rex.

FUCHSIA

(Ladies' Ear Drops)

These plants need only cool conditions with plenty of light, but little hot sun. We offer here some of the newest and most beautiful varieties, directly from California.

N267—CARGUNDY. In our opinion, the best of the real scarlet Fuchsias. Very large flowered. Fully double.

N296—TUTU. Double lavender-blue with broad white sepals; phlox-pink on underside. Lush foliage. Very large flowers.

N274—MILLIONAIRE. Very large flowers of deepest rich violet-purple with broad sepals of deep red.

N280—YULETIDE. Double white with crimson sepals.

POSTPAID PRICES on above Fuchsias: **75c** each; **3** for **1.98**.

FUCHSIA COLLECTION

Plant Now for Better Roses Next Spring!

You can have better roses next spring if you plant them this fall. The fall planted roses do not make any top growth during the fall and winter, but they do get a running start next spring because they already are in the ground to take advantage of melting snow and early spring rains. They get a good root growth before hot weather hits. IMPORTANT: Before we ship roses to you, we pre-prune them to about 12".

Plant in the usual way and then mound a foot or more of dirt over the plant so only tips of stems show. Remove this mound of dirt gently next spring when the buds start swelling, and then prune the stems back to about 8".

WHEN WE SHIP ROSES IN FALL: We usually ship rose plants in late October after they have become dormant in our fields so we can dig them.

★ SHRUBS

Unless otherwise noted, all shrubs are 12 to 18" size, pre-pruned back to about 10 to 12" before shipping.

You get an extra six-months' growth by planting shrubs in the fall. Just mound up dirt a foot or higher right over plants first winter; pull dirt away in the spring.

WHEN WE SHIP SHRUBS: We can ship shrubs only after they lose their leaves and become dormant, usually the latter part of October or the first part of November. You can plant them safely up until the ground freezes solid.

Here's Why Strawberry Plants
Packed in Polyethylene Film
are Better

The strawberry plants you get from Henry Field's are packed in a polyethylene plastic bag, as pictured here. This gets the plants to you in perfect condition because the plastic bag does these two things:

First, it retains the natural moisture content of the plants—they arrive neither too wet nor too dry. Secondly, while moisture can not pass thru the film, gases can, so the plant can "breathe", as all live plants must.

How Henry Field's Gives You Better

STRAWBERRY PLANTS For Fall Planting

We now are able to ship you fine dormant strawberry plants for fall planting on any date you want them after Sept. 1. Just write the date you want them on your order.

Until a few years ago, we always had trouble with fall dug strawberry plants because they could not be dug until very late in the season—too late for planting in many localities. Now, we dig the strawberry plants while they are dormant in the spring and immediately put them into cold storage. There they keep dormant and in perfect condition. When planted in the fall, they start growing immediately. (Remember that the plants reaching you are absolutely dormant, with most of the leaves brown, just as in early spring, so don't become alarmed at their appearance.)

This is a great step forward in the handling of strawberry plants because it makes fall planting worthwhile and practical.

Be Sure to Mulch Strawberries

Be sure to mulch fall planted strawberry plants with 3 to 4 inches of coarse litter (rye straw, pine boughs, etc.). Do this at freezing time to keep

the alternate freezing and thawing from heaving out the young plants.

Now—Field's Offer Strawberry Plants Indexed U.S.D.A. Virus Free

All our June Bearing strawberry plants have been field grown for us from virus free foundation stock furnished by the United States Dept. of Agriculture of Beltsville, Maryland.

Our everbearers are grown with the same selection methods and with the same care as the June Bearers, so we feel sure they are practically virus free too. As soon as the U.S.D.A. completes its indexing of the everbearing varieties, we will have them to offer and will so note in our catalog.

Burgundy is similar to the popular Sodus in appearance but, for the seven years that it has been under trial, it has consistently given better yields of berries, and has been far more resistant to disease.

The berries are very large, rich in color and flavor, and excellent both fresh and after canning or freezing.

soil condition. 3 for 1.39; 6 for 2.28; 12 for 3.98; 25 for 7.50; 50 for 13.98; 100 for 24.98, postpaid.

Large 2-YEAR TRANSPLANTED BERRY PLANTS *Bear Sooner, Make Fine Plants the FIRST YEAR*

These berry plants, after growing one year in the nursery field, are dug up and replanted. Thus, when they are dug for shipping at the end of the second year, they have a heavier, more compact root growth.

We wish we could sell nothing but 2-year transplanted berry plants because they are so much more satisfactory in every way. They are larger, stronger, heavier rooted, and the danger of your losing them in planting is greatly reduced. They'll even bear a few berries the first year. They are well worth the money, particularly for ordinary back yard planting, because they require very little care to get them established.

Supply not too large so, if and when we run out, we will ship twice the number in a smaller size.

Certified Blue Tag RANGER ALFALFA

Ranger Alfalfa is fully winter-hardy; in addition, has wilt resistance that kills Alfalfa plants in many areas. Dehydrating plants prefer it, farmers and ranchers rank it tops on their list and all livestock like its fine-stemmed, leafy hay. Whatever your need, Ranger will fill the bill.

Certified Blue Tag NEW LAHONTAN ALFALFA Resistant to Dread Spotted Alfalfa Aphid

Since the spotted alfalfa aphid made its appearance, it has caused millions of dollars of damage to the nation's most valuable hay crop. It was first found in the United States in one of our southwestern states in early 1954. The southern half of the United States west of the Mississippi River now has the aphid and it has

also been found in Maryland, Delaware, Virginia, Pennsylvania, New Jersey, New York, West Va., North Carolina, and as far north as central Iowa.

Lahontan Alfalfa is resistant to the spotted alfalfa aphid. But it is new, which means seed stocks are very limited. Some farm papers say it will have to be sold by the ounce, but we were fortunate in obtaining stocks, and will offer by the bushel while stocks last. Order early.

Certified Blue Tag NEW VERNAL ALFALFA

In several years of testing various types of alfalfa at the Iowa State College at Ames, they have found Vernal to be a most promising variety. Our seed is certified blue tag, so you are sure of getting the pure quill seed. Trials in Wisconsin and western Canada show Vernal has greater winter hardiness. It retains a darker green color longer, and will maintain a stand in mixture with brome, longer than other types of alfalfa. Because of its extreme hardiness three cuttings may be taken even in the far north. Better order early, supplies not great.

BROME-ALFALFA

For the finest permanent pasture possible, sow brome and alfalfa this fall. The correct seeding rate is 12 lbs. of brome and 6 to 8 lbs. of alfalfa per acre. This seeding will carry more livestock per acre than anything you can plant and is higher in feeding value.

HOME and GARDEN AIDS

DORMATONE

Prevents Potatoes from Sprouting

You can now store your home-grown potatoes for months without cold storage by using Dormatone, the hormone sprout inhibitor that prevents sprouting, softening and shriveling. Actually eliminates spoilage and large loss of weight. Shrinkage is reduced 10% to 15%. In addition, helps retain the nutritional value of potatoes and actually improves their cooking and eating qualities. Dormatone can also be used with equal success on other root crops such as beets, carrots, turnips and rutabagas.

It's easy and inexpensive to use—you just dust it on. Absolutely harmless, too. We've tried it on all sorts of root crops and are completely sold on it.

WARFARIN

Best of All Rat and Mouse Poisons

By far the most effective rat and mouse poison. Discovered at the University of Wisconsin and released by them in 1950. When used according to directions, never fails. Kills whole colonies easily and cheaply.

Warfarin is a better rodenticide for these four reasons:

- 1) It is much less dangerous to humans, livestock, pets and poultry.
- 2) You don't have to bother with two different poisons. Warfarin gets both rats and mice.
- 3) Warfarin is odorless and tasteless. Rodents do not develop "bait shyness".
- 4) Warfarin kills slowly. Dead and dying rats do not warn rest of colony.

Henry Field's Guarantee

We guarantee the nursery stock we send out to be completely satisfactory. If you are not pleased with it in every way when you receive it, return it promptly, at our expense, and it will be replaced or your money refunded, whichever you prefer. After you have planted it, if it fails to grow, we think we both should take part of the blame. We will take one-half and you and the weather take the other, and we'll replace at half price anything unsatisfactory through any fault of the stock if you notify us not later than May 1, 1958 on fall planted stock.

Non-Warranty

The Henry Field Seed & Nursery Company warrants to the extent of the purchase price that seeds sold are as described on the container, within recognized tolerances; that the bulbs and plants sold are as described on the label. The company gives no other or further warranty, express or implied.

About Substitutions

We never substitute unless we have to, and most of the time we don't have to. But, unless otherwise directed by you, we reserve the right to substitute a similar variety of equal or greater value when our supply of an item becomes exhausted. If you are not satisfied with the substitution, you may keep it with our compliments and, upon advice from you, we will either refund the purchase price of the original item or book you for shipment when the item is again available. Fair enough?

No C.O.D.'s, Please

We don't ship C.O.D. for two reasons:

First, it sometimes delays delivery, and nursery stock should be planted as soon as possible after we ship it. If it has to wait around to get delivered, it may not do too well.

Secondly, it increases your cost, and ours. It costs us extra to handle a C.O.D. shipment, and it costs you extra because you pay the C.O.D. fee when you receive the package. We want to keep the cost to you as low as possible.

HOW WE SHIP

If your first package does not include everything you ordered, don't worry, because we often make separate shipments of various items of your order.

The following are sent in separate packages, even when sent on the same day: garden seed and non-perishable goods; perennials; house plants; evergreens; roses, shrubs, etc.

Also, we ship according to proper planting time in your area; this sometimes causes separate shipments. And some items are not ready to ship as soon as others. For instance, fall bulbs are "ripe" enough to ship about Sept. 15, and we can ship perennials at about the same time. But trees and shrubs are not dormant enough to ship until late October or early November. Don't worry about their being too late for fall planting because you can plant successfully in the fall even when you have to break a heavy frozen crust to dig a hole.

Read the papers that come inside your package; they tell you what, if anything, is being shipped separately.

You Don't Lose If We Ship Parcel Post Items with Express Items

Almost all the items we sell are shipped parcel post prepaid. But some few trees are too big to send by parcel post, so we send them express collect. If this is so, we say so in giving the price in the catalog.

Now if your order includes both parcel post items and express items, we sometimes (not often) put them together in one bundle and ship the whole order by express. This very seldom increases your express charges. But, to be sure of being fair, we always include a little extra nursery stock free of charge in every express shipment.

HOW TO ORDER

We have chosen carefully the hundreds of items offered in this catalog for your use. Look over the descriptions and pictures carefully. They are as accurate and honest as we can make them, and will help you decide what to order.

For your convenience, we have enclosed an order blank with this catalog. We prefer that you use it, but write your order on any kind of paper and it will look good to us.

Please print, or write very plainly, your full name and complete address on all orders. Also, if you are ordering items which must be shipped by express, give location of your nearest express office.

Please order by catalog number. List quantity, variety, and size if any.

It is safer for you, and better for us, if you make payment by check, draft or money order. If you send coins or currency, wrap them carefully and register your letter.

MONTHLY PAY PLAN

for any order of \$40.00 or More on everything excepting Field Seed

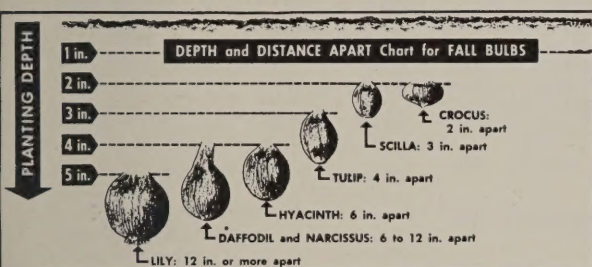

Henry Field's offer you a monthly pay plan if you wish to use it when your order totals \$40.00 or more. You may find this convenient if you want to do extensive landscaping now, either on a new lot, or in re-doing an old planting. Sometimes, when you have a lot of planting to do, you may have to spread the planting over several years if you have to pay all cash in advance. But with Henry Field's Monthly Pay Plan, you can get all the planting done at once. You don't have to wait—the plants can be growing, and you can be enjoying them.

This Monthly Pay Plan is good on the purchase of anything in our catalog excepting Field Seed. Write for further information if you are interested—no obligation, of course, and we'll be glad to explain how it works, telling you how much to send with order, and how much to pay each month.

How to Save on Railway Express Charges

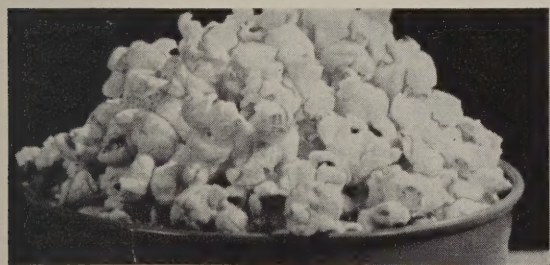

Some trees are too big to ship by parcel post; in that case we ship them express charges collect. That is, you pay the express charges when you receive the package. No tree will be shipped express unless we show it that way with the price in the catalog. The minimum charge for railway express is 2.01, plus 3% Federal tax, or a total of 2.07. Most packages do not exceed this minimum because we can ship 10 pounds 800 miles, or 20 pounds 300 miles, before going over the minimum.

However, to cut your express costs per tree, we suggest you order several trees. Five trees in a package, for instance, would reduce the express charge per tree to about 41c.

Plant your fall bulbs properly so that they have every chance of success and thus play their full part in beautifying your garden.

The above chart shows you how deep to plant the bulbs, and how far apart. However, if the ground has been newly spaded, and is quite loose, plant the bulbs an inch or so deeper to allow for settling, and because of the increased effect of frost heaving on newly turned soil. Also, late planted bulbs, which have no opportunity to make roots before the soil freezes, should be set a little deeper to protect them from frost action.

A2040—Black Hawk was released by the Iowa State College after more than twenty years of careful testing. During that testing period, it was known as Ames No. 20.

It is a midseason variety. The fruits are large, glossy black, firm, pick easily, and do not crumble. Quality is rated very good, and equal to the best of the blacks. Excellent for freezing and, when canned, retains its shape.

CRIMSON STAR

HYBRID WHITE

Large-Flowered HYBRID CLEMATIS

Flowers Up to 6" Across

Hybrid Clematis are one of the heaviest blooming, largest flowered, most beautiful, of all climbers. Nothing but a climbing rose even comes close to equaling it.

Fall is a very good time to plant Hybrid Clematis. When planted around a house, it does best on the east or northeast side. Mound the plant over with dirt for the winter and, next spring, it will grow and bloom beautifully. If your soil is inclined to be acid, or sour, work in a little lime before planting Clematis. We send you plants out of 2 1/4" pots as we find that size does best for you.

A1710—CRIMSON STAR. The same type as Jackmani except the flowers are a rich red and from 4 to 6 inches across. Blooms over a long period.

All 3 for only

\$2.69 PPD.

No. A2410X
